

Gender Pay Gap Report 2021

23.5 Degrees Ltd is Starbucks first UK franchised business partner and is required to report annually on gender pay in the UK as necessitated by the UK Equality Act 2010 (Gender Pay Gap Information) Regulations 2017.

With over 80 stores, and over 1500 staff, 23.5 Degrees Ltd takes great pride in being an exciting and equitable place to work. At 23.5 Degrees Ltd, everyone is paid for the role they have in the team and their performance in that role. No other factors affect employee remuneration.

23.5 Degrees Ltd is an Equal Pay employer with men and women performing equal work receive equal pay. 23.5 Degrees Ltd does have a Gender Pay Gap but are pleased to report that for our mean Gender Pay Gap has reduced to just under 8% compared to the previous year's figure of 9%. We will continually explore how we can close any gaps found within our company to create more gender balance. We practice equal opportunities, and we firmly believe in appointing the best candidate into a role regardless of their gender or other factors covered by the Equality Act.

As a company we will continue to assess applications for roles based on competency, and on personal choices our staff have made around their work patterns and work-life balance, not gender and continue to develop our talents from barista to directors, growing our team based on drive for career progression within 23.5 Degrees. The majority of employees instore and back office are female, which we believe is due to shift patterns, and roles within those shifts, along with a large number of positions being part time.

The following figures have been reached using the mechanisms set out in the gender pay gap reporting legislation. The causes of a gender pay gap can be a complex and shifting mix of factors including work, society and family, but by monitoring the pay gap between men and women we can better understand the gap and so target action to reduce it.
